

Homework for year 5/6 - 4/5/18

English Read the extract below from *Fantastic Beasts And Where To Find Them*, by Newt Scamander. Note any words whose meaning you are unsure of. Make a prediction - explaining how you have used clues to help you come to this meaning. Check the words in the dictionary, giving the actual meaning where necessary.

It would be erroneous to deny that security breaches have not transpired. A rogue creature once attacked a beach full of sunbathing Muggles. Fatalities were mercifully thwarted by the valiant actions of a holidaying wizarding family, who immediately performed the largest batch of Memory Charms¹ this century on the inhabitants of Ilfracombe, thus narrowly averting a calamity. In the event of magical catastrophes becoming evident to the Muggle world, the Office of Misinformation will liaise directly with the Muggle Prime Minister to seek a plausible non-magical explanation. The unstinting efforts of this office in persuading Muggles that all photographic evidence of the Loch Ness monster is counterfeit have salvaged a situation which at one time looked exceedingly precarious.

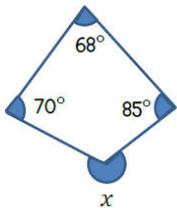

¹Memory Charms can have a range of effects. For example, they may distort vision. Charms should be performed daily, as their effects are apt to wear off.

Art Next week you will be creating a leaflet for caring for a magical creature. Create a picture of the creature that you will be writing about. It should show off your artistic techniques. It can be a pencil drawing, watercolours or any media you choose.

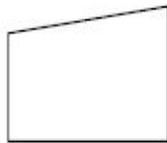

Maths **Y5** Do the MyMaths tasks set.

Y6 Answer the 2 angle questions below:

Find the angle marked x

Describe this quadrilateral.

- It has ___ angles.
- It has ___ right angles.
- It has ___ obtuse angle.
- It has ___ acute angle.
- It has ___ lines of symmetry.

Make sure **all** MyMaths tasks are up-to-date and you have nothing still outstanding. Use the MyMaths site to review any areas of work that you still need to practise.

This homework is due in by Wednesday 9th May. Please see your teacher if you have any queries.
